Human Sectional Anatomy: Pocket atlas of body sections, CT and MRI images, Fourth edition Adrian Kendal Dixon, David J. Bowden, Bari M. Logan, Harold Ellis

Now in its fourth edition, this portable guide and essential learning aid now contains new material. As with the previous editions, the superb full-color cadaver sections are compared with CT and MRI images. The radiological images have all been replaced with new examples for this latest edition, taken on the most up-to-date equipment to ensure excellent visualization of the anatomy. The photographic material is enhanced by useful notes with details of important anatomical and radiological features.
