New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis)

New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis)

This volume is a selection of written notes corresponding to courses taught at the CIMPA School: "New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing and Multifractal Analysis". New interactions between harmonic analysis and signal and image processing have seen striking development in the last 10 years, and several technological deadlocks have been solved through the resolution of deep theoretical problems in harmonic analysis. New Trends in Applied Harmonic Analysis focuses on two particularly active areas that are representative of such advances: multifractal analysis, and sparse representation and compressed sensing. The contributions are written by leaders in these areas, and cover both theoretical aspects and applications. This work should prove useful not only to PhD students and postdocs in mathematics and signal and image processing, but also to researchers working in related topics.

From reader reviews:

Rodney Mitchell:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each e-book has different aim as well as goal; it means that reserve has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they acquire because their hobby is usually reading a book. What about the person who don't like studying a book? Sometime, individual feel need book when they found difficult problem or exercise. Well, probably you should have this New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis).

John Stewart:

This book untitled New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis) to be one of several books this best seller in this year, this is because when you read this reserve you can get a lot of benefit in it. You will easily to buy that book in the book retail outlet or you can order it via online. The publisher of this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason for your requirements to past this reserve from your list.

Violet Murray:

The guide with title New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis) includes a lot of information that you can discover it. You can get a lot of profit after read this book. That book exist new information the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to be aware of how the improvement of the world. This specific book will bring you in new era of the globalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Dennis Green:

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't determine book by its handle may doesn't work the following is difficult job because you are afraid that the inside maybe not while fantastic as in the outside search likes. Maybe you answer could be New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing, and Multifractal Analysis (Applied and Numerical Harmonic Analysis) why because the excellent cover that make you consider with regards to the content will not disappoint you. The inside or content will be fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.
