Red Hope: An Earth To Mars Adventure Thriller - Book 1 John Dreese

NOTE: Red Hope is a fast-paced modern-day adventure, *not hard Sci-Fi like The Martian*.

For two million years, Mars has hidden a secret. Two hours ago, the Mars Curiosity rover found it. An emergency meeting is in progress at the White House. Using technology pulled from today's laboratories, America sends a hastily assembled crew on a dangerous discovery mission to the Red Planet. Will you figure out the tragic secret before the astronauts do?

A NOTE FOR READERS FROM THE AUTHOR:

Red Hope is book one of a two-novel series. It has an entertaining ending, but there is a very **mild cliffhanger**. The second book is being written right now. Red Hope is intended for a general audience - you won't need a calculator or a slide rule to enjoy this adventure novel filled with interesting characters.

LONG DESCRIPTION:

The Mars Curiosity rover rolls across the dusty Red Planet. On-board cameras detect something shimmering on the horizon. Engineers re-direct it to go investigate. When the rover finally arrives, the cameras capture shocking images of five-fingered fossils embedded in a mysterious boulder, located right next to an unusual stone building. Just as Curiosity attempts to transmit high-resolution photos, *the power cuts out*.

With the reckless ambition of an embattled president, a high-risk discovery mission is planned on a rushed deadline. It's all made possible with technology from a Silicon Valley tycoon who was in the right place at the right time. Equipment is built too quickly; flaws and a *Wart* are sent to the launch pad.

The initial crew balks at the mission for safety reasons, but not family man Adam Alston - he's the consummate professional who will do what his country asks him. And he's nearly broke after his post-astronaut business ventures have quietly failed. This lucky break becomes his last chance to save his family and his career - *perhaps not in that order*.

Ride along with Captain Alston and his crew as NASA is plunged into a race to the Red Planet with little time to spare. Nothing can prepare them for the split-second back-stabbing decisions they'll make along the way. Will they find out the secret of the mysterious fossils? Or will the human pride they carry to Mars condemn their mission and all of humanity?

PRAISE FOR RED HOPE:

"I couldn't stop turning the pages. I was constantly wondering what would happen next." - Amazon Reviewer

"This was a rip roaring fun read." - Amazon Reviewer

"A science fiction thriller based (for a change) on solid science." - Amazon Reviewer

"John Dreese has written an exciting and imaginative SciFi space exploration novel." - Amazon Reviewer

"This is probably the best self-published book I've read." - Amazon Reviewer

NOTE: Many readers have enjoyed both Red Hope and The Martian, but they are very different in terms of pacing, storytelling and genre. The Martian by Andy Weir is Hard SciFi and contains the nitty-gritty minutiae of daily living on Mars. Red Hope is a fast-paced adventure story with a little bit of thriller thrown in.

This is the first novel in a two-book series and it ends with a mild cliffhanger.

So , if we ask do people have time, we will say absolutely indeed. People is human not just a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to anyone of course your answer will unlimited right. Then do you try this one, reading ebooks. It can be your alternative with spending your spare time, the book you have read is definitely Red Hope: An Earth To Mars Adventure Thriller - Book 1.

Candice Sharkey:

Is it an individual who having spare time after that spend it whole day by watching television programs or just resting on the bed? Do you need something new? This Red Hope: An Earth To Mars Adventure Thriller - Book 1 can be the response, oh how comes? A fresh book you know. You are and so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these ebooks have than the others?

Harry Dwyer:

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's heart and soul or real their passion. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Red Hope: An Earth To Mars Adventure Thriller - Book 1 can make you experience more interested to read.
