Interpretive Social Science: A Second Look

This is a new edition of the well-received *Interpretive Social Science* (California, 1979), in which Paul Rabinow and William M. Sullivan predicted the increasing use of an interpretive approach in the social sciences, one that would replace a model based on the natural sciences. In this volume, Rabinow and Sullivan provide a synthetic discussion of the new scholarship in this area and offer twelve essays, eight of them new, embodying the very best work on interpretive approaches to the study of human society.
