Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) R. Venkata Rao

Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods presents the concepts and details of applications of MADM methods. A range of methods are covered including Analytic Hierarchy Process (AHP), Technique for Order Preference by Similarity to Ideal Solution (TOPSIS), VIšekriterijumsko KOmpromisno Rangiranje (VIKOR), Data Envelopment Analysis (DEA), Preference Ranking METHod for Enrichment Evaluations (PROMETHEE), ELimination Et Choix Traduisant la Réalité (ELECTRE), COMplex PROportional ASsessment (COPRAS), Grey Relational Analysis (GRA), UTility Additive (UTA), and Ordered Weighted Averaging (OWA).

The existing MADM methods are improved upon and three novel multiple attribute decision making methods for solving the decision making problems of the manufacturing environment are proposed. The concept of integrated weights is introduced in the proposed subjective and objective integrated weights (SOIW) method and the weighted Euclidean distance based approach (WEDBA) to consider both the decision maker's subjective preferences as well as the distribution of the attributes data of the decision matrix. These methods, which use fuzzy logic to convert the qualitative attributes into the quantitative attributes, are supported by various real-world application examples. Also, computer codes for AHP, TOPSIS, DEA, PROMETHEE, ELECTRE, COPRAS, and SOIW methods are included.

This comprehensive coverage makes *Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods* a key reference for the designers, manufacturing engineers, practitioners, managers, institutes involved in both design and manufacturing related projects. It is also an ideal study resource for applied research workers, academicians, and students in mechanical and industrial engineering.

From reader reviews:

Eunice Bourque:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The details you get based on what kind of reserve you read, if you want attract knowledge just go with education books but if you want really feel happy read one along with theme for entertaining like comic or novel. The Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) is kind of book which is giving the reader unforeseen experience.

Robert Qualls:

This Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) are usually reliable for you who want to be considered a successful person, why. The explanation of this Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) can be among the great books you must have is usually giving you more than just simple studying food but feed you with information that might be will shock your prior knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day exercise. So , let's have it and revel in reading.

Jess Cooke:

Do you have something that you like such as book? The reserve lovers usually prefer to decide on book like comic, quick story and the biggest the first is novel. Now, why not trying Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) that give your entertainment preference will be satisfied through reading this book. Reading addiction all over the world can be said as the means for people to know world far better then how they react toward the world. It can't be explained constantly that reading routine only for the geeky man but for all of you who wants to always be success person. So , for all you who want to start looking at as your good habit, it is possible to pick Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) become your current starter.

Sunny Weaver:

Publication is one of source of know-how. We can add our know-how from it. Not only for students but in addition native or citizen want book to know the change information of year for you to year. As we know those guides have many advantages. Beside most of us add our knowledge, also can bring us to around the world. With the book Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) we can have more advantage. Don't someone to be creative people? To be creative person must want to read a book. Just choose the best book that suitable with your aim. Don't become doubt to change your life with this book Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing). You can more inviting than now.
