Brain-Computer Interface Research: A State-of-the-Art Summary (SpringerBriefs in Electrical and Computer Engineering)

Brain-Computer Interface Research: A State-of-the-Art Summary (SpringerBriefs in Electrical and Computer Engineering)

Brain-computer interfaces (BCIs) are rapidly developing into a mainstream, worldwide research endeavor. With so many new groups and projects, it can be difficult to identify the best ones. This book summarizes ten leading projects from around the world. About 60 submissions were received in 2011 for the highly competitive BCI Research Award, and an international jury selected the top ten. This Brief gives a concise but carefully illustrated and fully up-to-date description of each of these projects, together with an introduction and concluding chapter by the editors.
