A Social and Economic History of Twentieth-Century Europe

Gerold Ambrosius, William H. Hubbard

A Social and Economic History of Twentieth-Century Europe Gerold Ambrosius, William H. Hubbard

In the decades since the end of the Second World War, the unification of Europe has been a subject of enormous importance and tension to politicians, citizens, and scholars. Yet lacking the basic demographic, economic, and social data that would provide a fuller picture of what this integration will involve, the debate has produced more heat than light.

This book, the most comprehensive single-volume source of information available on the social and economic transformations in Europe over the past hundred years, fills that critical gap in our knowledge. In its pages we find examinations of population trends (including growth, mortality, national and international migration, and fertility), social structures (work, income, lifestyle, consumer patterns, welfare programs), and economic structures (agriculture, industry, and services), and an integrative overview of changes in both the organization of the economy and the role of the state in economic management. Paying particular attention to the period since 1950, the authors summarize the developmental paths of the four socioeconomic regions of Europe. The data and analyses provided here make this book an invaluable resource to professionals and scholars in a wide range of fields, from history, politics, and economics to journalism and international business.
