Mediterranean Diet for Beginners**

Sugar is not our friend. It is found all over the place, it is not something that you should introduce into your body. But the American Diet never heeds this voice. It brings in lots of foods that have sugar all over the place. Whether you are enjoying the sugar in your favorite dessert or in your daily drink, there is sugar all over and you are going to find that it is difficult to have this much sugar on your health.

Many people find that they are suffering from **sugar addiction**. Their brains are used to having all this sugar in order to feel happy and without the right amount of sugar that they are used to, it becomes really difficult to stay positive and happy. The brain is going to wait until you bring in the right amount of sugar to give it that sugar rush it is looking for. This is hard on your body though because of all the damage that lots of sugar can do to your body.

If you are ready to learn more about **sugar** and why it is so bad for your body, make sure to check out this guidebook. There is a lot that many people don't know about sugar and they assume they are safe eating what they would like. Even those who understand that sugar isn't that healthy will often eat foods that have hidden sugar inside and other sugar busters that make them feel just as bad as eating the desserts that they are trying to avoid.

Over time, this much sugar is going to start ruining your health. Many common health issues, such as diabetes, inflammation, cancer, and so much more are caused by people eating too much sugar over a long period of time. If you are dealing with a lot of horrible health issues and can't seem to get them to get better no matter what you try, it may be time to go **sugar free** for some time.

Much of this guidebook is devoted to talking about a **sugar detox** and some of the things you should do while on this detox to stay safe and healthy. You will have to really watch the foods that you are eating and realize that this is not going to be that easy of a process; your brain wants the sugar and it may take a few weeks of hard work in order to get this to work out right. But with the right dedication, you will find that it is possible to get rid of the **sugar** and feel amazing.

When you are done having bad health problems that won't go away and you want to make some changes for the better when it comes to the foods you eat, it is time to take a look at this guidebook. It has all the information that you need in order to take care of those nasty **sugar cravings** and to get you on the right

track to feeling amazing again in no time.
