An Anthology of Logical Prose: Observations on Civilization, the Human Condition, & Current Affairs Omar Alansari-Kreger

Every idea is shrouded in some kind of opinion. Philosophies begin as simple rants that go on to define the principles of a civilized humanity. Society emphasizes a common need for a reasonable truth relatable to all. In a world that is defined by the power of modern utility, people are becoming smaller and the institutions that produce fruits of modernity are growing increasingly hegemonic. The concerned private citizen has always served as the backbone of civilization. As a sociological body, they cringe at the notion of lethargic apathy. The sons and daughters of empire are the most disillusioned with the meaning of reason and reality. The deprivation of hardship is the deprivation of experience. The children of empire make names for themselves as prolific thrill seekers. Yet, an enthralled chase is hardly the stuff of a meaningful existence. Modern utility is no substitute for a sense of belonging; through the latter, we find reasons to stand for something. Hence, a life worth living is the same as one worth saving. When populations are marginalized they are ignored by their rulers. A nation of power relies on a system of sociological spoils. As long as a standing population accepts an illusion of freedom, it has ample reason to remain within the repressive parameters of the status quo. The author argues that some of the greatest crimes against humanity occur when populations are subliminally marshalled into accepting an illusionary sociological freedom. The right of free expression ensures that governments and bureaucracies do not get too powerful. Hegemonies of power are engineered out of desires for absolute control. We often misplace the fact that some of the greatest experiments made in the name of statecraft were forged out of the ideas of concerned private citizens. Hence, the root origin of all human philosophy is cultivated through the power of concerted critical opinion.
