Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications)

Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications)

Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications)
Taking another lesson from nature, the latest advances in image processing technology seek to combine image data from several diverse types of sensors in order to obtain a more accurate view of the scene: very much the same as we rely on our five senses. Multi-Sensor Image Fusion and Its Applications is the first text dedicated to the theory and practice of the registration and fusion of image data, covering such approaches as statistical methods, color-related techniques, model-based methods, and visual information display strategies.

After a review of state-of-the-art image fusion techniques, the book provides an overview of fusion algorithms and fusion performance evaluation. The following chapters explore recent progress and practical applications of the proposed techniques to solving problems in such areas as medical diagnosis, surveillance and biometric systems, remote sensing, nondestructive evaluation, blurred image restoration, and image quality assessment. Recognized leaders from industry and academia contribute the chapters, reflecting the latest research trends and providing useful algorithms to aid implementation.

Supplying a 28-page full-color insert, Multi-Sensor Image Fusion and Its Applications clearly demonstrates the benefits and possibilities of this revolutionary development. It provides a solid knowledge base for applying these cutting-edge techniques to new challenges and creating future advances.

From reader reviews:

Ana Steadman:

Information is provisions for folks to get better life, information presently can get by anyone at everywhere. The information can be a knowledge or any news even an issue. What people must be consider if those information which is within the former life are challenging be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you get the unstable resource then you understand it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) as your daily resource information.

Matthew Gregg:

Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) can be one of your beginning books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort that will put every word into enjoyment arrangement in writing Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) yet doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource information that maybe you can be certainly one of it. This great information could drawn you into brand new stage of crucial contemplating.

Frank Moore:

This Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) is great publication for you because the content that is full of information for you who else always deal with world and still have to make decision every minute. That book reveal it information accurately using great arrange word or we can declare no rambling sentences inside it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with lovely delivering sentences. Having Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) in your hand like having the world in your arm, facts in it is not ridiculous a single. We can say that no e-book that offer you world throughout ten or fifteen moment right but this publication already do that. So , this is certainly good reading book. Hello Mr. and Mrs. stressful do you still doubt which?

Ingrid Baumbach:

A lot of reserve has printed but it is different. You can get it by world wide web on social media. You can choose the best book for you, science, comedy, novel, or whatever through searching from it. It is referred to as of book Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications). You can add your knowledge by it. Without making the printed book, it could possibly add your knowledge and

make a person happier to read. It is most significant that, you must aware about book. It can bring you from one spot to other place.
