We build our lives on essential but seemingly mundane things: Food, Shelter, Families, Neighbors, Work, and Play. The unremembered details of people's everyday struggles and successes have shaped history and continue to drive the world we know. This exciting new resource offers an unprecedented look at human history's living heart: the billions of anonymous men and women often forgotten by historical studies, but without whose lives human history would be meaningless. Perfect for general readers and students of world history, U.S. history, literature, drama, social studies, anthropology, religion, and more, this award-winning resource offers an unprecedented look at how people lived, ate, dressed, worshipped, toiled, played, married and died, and much much more. Organized by timeframe (each volume covers a finite period) and then by topic (Historical Overview, then Domestic, Economic, Intellectual, Material, Political, Recreational, and Religious Life, followed by primary sources), this set will meet the needs of a vast percentage of library patrons for both curricular studies as well as personal interest areas.

Our lives are built on essential but mundane things: food, shelter, families, neighbors, work, and play. Our activities rarely rise to headline-making greatness, and the same holds true for the majority of people throughout history. Yet it's the unremembered details of people's everyday struggles and successes that have shaped history and continue to drive the world we know. Based in part on Greenwood's award-winning *Daily Life through History* series, *The Greenwood Encyclopedia of Daily Life* offers an unprecedented look at human history's living heart: the billions of anonymous man and women too often forgotten by historical studies, but without whose lives human history would be meaningless. Providing unparalleled breadth and depth, this six-volume set is organized both thematically and chronologically.

Panoramic overview articles show the full range and interconnections of everyday life throughout history. General topics are then broken into component parts, each of which is explored in detailed essays. The chronological and thematic organizations, aided by concept compasses that graphically show interconnections and act as visual navigational cues, reflect how students really learn. All regions of the world are covered at various points in their histories.

Volume 1 examines the ancient world, from the beginnings of civilization in 3,500 B.C.E. through the Roman Empire in 400 C.E. Volume 2 covers from 400 to 1400 C.E.

Volume 3 explores the 15th and 16th centuries

Volume 4 looks at the 17th and 18th centuries

Volume 5 examines the 19th century

Volume 6 covers the 20th century
