## **Tissue Culture Techniques for Horticultural Crops** Kenneth C. Torres

This book was written for those individuals who are concerned about the techniques and practices of plant cell cultures for horticultural crops. It was designed to serve as a text and reference for students and professionals in ornamental horticulture, fruit and vegetable crop production, botany, forestry, and other areas of plant science. Research during the last twenty-five years in the area of plant tissue culture has led to many developments and changes in this field. Although the techniques involved in the manipulation of plant tissue culture are now relatively straightforward, the presentation of these techniques in a short volume for the beginner in the field is generally unavailable. In addition to describing the techniques for establishment and manipulation of specific species, several chapters in this book also provide a brief, general review of important cultural parameters. Specific protocols and laboratory procedures may also be found in the appendix. I hope that this presentation of information will be helpful to those individuals wanting to apply plant tissue culture techniques for horticultural crops.

The book was authored by the very famous author. The author makes some research before write this book. That book very easy to read you may get the point easily after looking over this book.

#### **Janna Lefevre:**

Is it you actually who having spare time after that spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Tissue Culture Techniques for Horticultural Crops can be the response, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these publications have than the others?

#### **Frances Drury:**

As a university student exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Tissue Culture Techniques for Horticultural Crops can make you sense more interested to read.
